

The 13th Asia-Pacific Chitin & Chitosan Symposium
The 32nd Annual Meeting of Korean Society for Chitin & Chitosan
Future Paradigms and Strategies
for Functionality and Applicability of Chitin and Chitosan

November 30-December 2, 2022
Great hall, Jeju Oriental Hotel

Organized by
The Korean Society for Chitin & Chitosan and
The 13th APCCS Committee

● **Welcome Message**

On behalf of organizing committee, it is a great honor to welcome you to Jeju Island, Republic of Korea for The 13th Asia-Pacific Chitin and Chitosan Symposium in 2022. I strongly believe that this symposium will bring together world-leading researchers, scientists, and entrepreneurs in several focused areas of chitin and chitosan and its applications.

The APCCS 2022 program highlights ten scientific themes including, chitin & chitosan as biomaterial, industrial and medical development strategies for chitin and chitosan as well as new paradigm for chitin and chitosan.

The program will consist of plenary lectures, oral sessions and poster sessions. The organizing committee is also planning a variety of unique social program and participants will enjoy fascinating Korean Jeju Island culture along with warm spirit of friendship.

I wish you a very pleasant stay here in Jeju Island and we hope that APCCS 2022 will bring great benefits to all of us. Welcome to Jeju Island, Korea to attend the APCCS 2022.

Hyun Jin Park and Kwontack Hwang
Chair, APCCS 2022

● **About Asia Pacific Chitin and Chitosan Symposium (APCCS)**

Asia-Pacific Chitin & Chitosan Symposium (APCCS) is the world's largest global platform for chitin and chitosan based technology involving more than 30 countries in Asia. Following the 12th APCCS International Symposium held in Osaka, Japan in 2018, it has been decided that the 13th APCCS to be held in Jeju Island, Republic of Korea. We are expecting more than 500 researchers from about 20 countries and the symposium will take place at the Jeju Oriental Hotel in November 30-December 2, 2022. We sincerely invite you to share your knowledge and perspective on the future prospects of chitin and chitosan research and application.

● About Jeju Island

Jeju Island is the largest volcanic island located to the southwest of the Korean Peninsula. The island boasts fascinating historical relics and a unique folk culture. Blessed with a great natural environment, Jeju is home to countless fresh regional products, and its simple and natural culinary tradition.

Nature

When you visit Jeju Island, the mountains, ocean, oreum (parasitic volcanoes), stones, wind, and its unique culture are icons of Jeju tourism that capture the hearts of visitors from all around the world.

Cuisine

Due to its environment, Jeju rarely produces rice. Instead, beans and other grains like barley are produced. Seafood is bountiful, and the livestock industry is also well developed. Locally, there are many dishes centered on pork, chicken, and fish.
